

This is not an owl!

Occasionally nest boxes will be occupied by other animals of the boreal forest including mammals, birds, and even insects such as wasps.

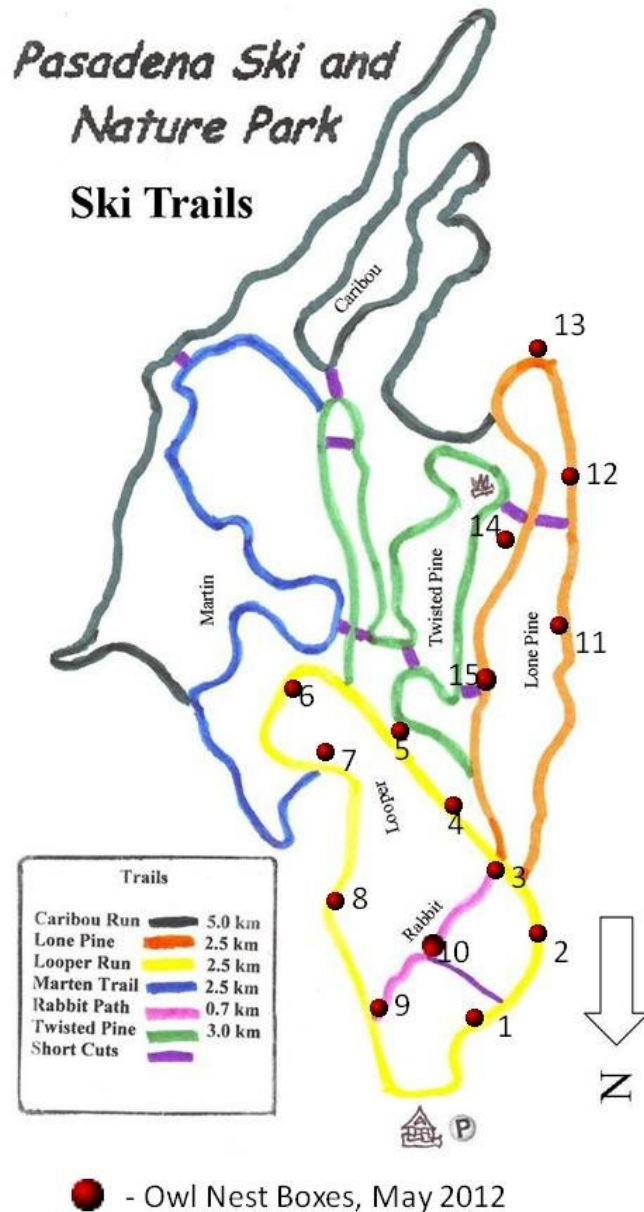

Please report any nest box use whether owl or some other individual or group.

Owl Nest Box Project

The Pasadena Ski and Nature Park has 15 nest boxes placed around the ski trails as shown on the accompanying map. The boxes are to provide nesting sites for our two small owls, the Boreal Owl and the Saw-whet Owl. These owls normally nest in April-May-June. Naturalists are encouraged to report any nest box use (whether owls or other birds/animals) to the following individuals indicating the number of the box being used:

Lois Bateman - lbateman@grenfell.mun.ca

Or

Henry Mann - hmann@grenfell.mun.ca
